#### AI (Artificial Intelligence) LABORATORY

**Lab Incharge:** Mr. R. Gautham Praveen **Technician:** Ms. B. Ramathilagam

#### **Major Equipment:**

Hp Intel Core I7 12 th Gen, 1TB HDD, 32GB DDR 4 Ram, Nvidia 4GB Graphics Card, 1

TB HDD, HP 19'5 Monitor, HP KB & Mouse Cost of the Major Equipment: Rs. 43,50,000/-

Area of the Laboratory: 88.628 Sq. m

- ➤ AI Laboratory has 60 computers of various requirements for the curriculum and academic purposes are installed.
- ➤ In that all the 60 computers are very advanced computers which is helpful to run complex exercises too.
- ➤ All the machines have Windows 10 installed on it with preinstalled Windows defender services for the security purposes. All the Computers are installed with required software that are needed to conduct the regular scheduled laboratories.
- ➤ This Lab is equipped with good Air-conditioning systems.
- As well as it has UPS power supply for the unhindered power supply. Every system is numbered with unique number for the identification.
- > Student system ratio is 1:1 so every student can work with no interruptions.
- A student log book is maintained to know the details about student and computer details in the laboratory.
- > This lab is equipped with a LCD projector for providing demonstration classes.
- ➤ Good structured cabling is done throughout the lab.
- ➤ Carbon di oxide Fire Extinguisher is deployed. As the Computers and its components are under class 'C' fire accident types this CO₂gas extinguisher is deployed.
- ➤ Provided MCB for Every row Computers separately to protect the mother boards and other computer components from the short circuits and power overload.
- ➤ Proper earthing is done to avoid the electrical shocks for humans as well as heavy voltage flow in the computer components and circuits.
- All Systems have UPS power supply to avoid sudden power failures. Sudden failures may corrupt and damage the internal parts of the computer.
- ➤ Network switches are kept in the racks under good air conditions to avoid the network problems and overheating issues.
- Emergency Exit is provided in cases of any unexpected accidents.

### **Sample Projects:**

Title: HYDRA BUG

**Abstact:** Lake cleaning machines will be employed in surface water bodies such as lakes and ponds where there is an accumulation of waste, such as plastics. They are designed to collect and remove waste from the water surface. The integrated systemin corporates the usage of AI and IoT technology, providing flexibility to monitor and control the entire process. This

Title: Smart Academic Monitoring and Attendance System for Parents

**Abstract:** An innovative application is designed to empower parents by providing seamless, real-time access to their children's academic performance and daily attendance records. With a secure login system, parents can monitor their child's progress, track attendance, view grades, and receive important updates in a visually engaging and user-friendly interface. This app offers a comprehensive, all-in-one solution for staying connected to your child's education, enabling proactive involvement and timely support.

**Faculty Startup** #1 *qoresys - Imba*, a virtual personal assistant for the education sector like Siri, Ok Google to solve the problems in the Education Sector. Teachers benefit from streamlined lesson planning and classroom management tools, while parents receive real-time updates and engagement opportunities. Imba integrates with educational tools and supports multilingual and special needs adaptations, making it an essential companion for a more effective and inclusive educational experience.
